6A Unruly					
6A.1 Expressively Impulsive	0	8			
6A.2 Acting-Out Mechanism	0	11			
6A.3 Interpersonally Irresponsible	0	7			

The scores in this report are based on normative data that were obtained from 13- to 18-year-olds who were being seen in professional treatment settings for emotional, behavioral, social, and/or academic problems. Scores reported for respondents who do not fit this normative population or who have taken the MACI-II for purposes other than clarification of such clinical concerns may not be accurate. Further, owing to fluctuations in emotion, behavior, and self-awareness that are characteristic of this age group, this score report should be considered a "snapshot" of this adolescent's emerging and changeable psychological patterns.

The MACI-II profile report cannot be considered definitive and should be employed as one component of a thorough clinical evaluation. Scores in this report should be evaluated by a qualified mental health clinician trained in the use of psychological tests and should not be shown directly to either the adolescent or their parent(s) or guardian(s) without careful consideration and clinical discretion.

INTERPRETIVE CONSIDERATIONS

In addition to the preceding considerations, the profile report should be evaluated in light of the following demographic and situational factors. This 14-year-old is currently in the 9th grade. In the demographic portion of the test, she identifies "self-confidence" and "social life" as the problems that are troubling her the most.

This adolescent's score on the Response Negativity scale is at the 61st percentile, placing it in the middle 50% of scores (i.e., the 25th through 75th percentile) obtained by the MACI-II normative sample. This middle-range score suggests that it is unlikely that she substantially underreported or overreported problems when completing the inventory.

NOTEWORTHY RESPONSES

This adolescent answered the following statements in the direction noted in parentheses beside the item. These items suggest specific problem areas that the clinician may wish to investigate. Additionally, the number of items in each response category endorsed by this adolescent is listed beside each category, followed by the total number of items in each category.

Vengefully Prone (0/3)

No items.

Suicidal Thoughts (0/3)

No items.

Non-suicidal Self-injury (1/2)

55. Item Content Omitted (True)

Traumatic Experiences (1/4)

84. Item Content Omitted (True)

Special Note:

The content of the test items is included in the actual reports. To protect the integrity of the measure, the item content does not appear in this sample report.

Lapses in Reality Testing (0/3)

No items.

Despondency-Despair (4/4)

- 2. Item Content Omitted (True)
- 44. Item Content Omitted (True)
- 77. Item Content Omitted (True)
- 117. Item Content Omitted (True)

Bipolar Spectrum (0/3)

No items.

Explosive Anger (0/3)

No items.

Impulse Control Problems (0/3)

No items.

Instrumental Anger (0/3)

No items.

Alcohol/Drug Use (1/2)

- 11. Item Content Omitted (True)

Eating Concerns (0/3)

No items.
