# Understanding my Personality Preferences

WHERE DO I GET MY ENERGY FROM?

## extraversion

I get my energy from talking about things that I am learning and enjoy. Talking also makes it easier for me to remember things. If you only want me to listen to you without giving me a chance to talk as well, I might get bored even if the topic is interesting.

## introversion

If you talk to me about interesting topics, I am a good listener, but if I get bored, I get my energy by allowing my thoughts to wander. Although I do sometimes enjoy being in groups, I don't usually like being the centre of attention, especially with people I don't know very well.

WHAT TYPE OF INFORMATION DO I PREFER?

## sensing

I work best when I have specific directions to follow; the more detailed the information, the better I will do my work.

## intuition

I work best when given options; if you give me broad instructions, I can come up with lots of ideas and ways to do my work.

## HOW DO I PREFER TO MAKE DECISIONS?

### thinking

I get excited when I feel that my mind is challenged. If I think I am right, I will try to convince others to think how I'm thinking. I can be quite direct, and might sometimes make others uncomfortable without realising it.

### feeling

I get excited when people are friendly and want to work together. I like being in classes and groups where we can be the best we can be and where we are helpful to others when they need it. Sometimes I don't say something because I feel it might hurt another person.

## HOW DO I ORGANISE MY LIFE?

### judging

I like to know what I must do each day so that I can plan what to do with my time. I do not like doing things under pressure at the last minute. I like to finish my homework and chores first and then have fun.

### perceiving

I like it when we don't do the same thing everyday and do something out of the ordinary. I like doing things at the last minute. I like playing and having fun while I study and do my chores.
