EXERCISE: MATHEMATICS OR MATHEMATICAL LITERACY	16
TAKING THE NEXT STEPS	17
FINALLY	18
ACKNOWLEDGEMENTS	18

PERSONAL LETTER

DEAR LEARNER

You have attended school for many years. The next important step in your school career is to choose the right subjects for the career you may want to follow after school. This is not an easy task!

To choose the right subjects means that you have to make sure that you know:

- Which subjects are offered at your school
- What these subjects are all about
- Which future careers you want to consider
- Which subjects and careers could best fit you as a person

If you have all of the above information, and you know and understand yourself well, it becomes easier to choose the right subjects.

You have the best chance of being satisfied with your future career if the career you are considering suits you as a person. For this reason you have to know and understand yourself very well. It is also best to consider more than one future career.

When you choose subjects, make sure that you select those subjects that would give you the widest choice of jobs and careers. This is particularly important if you are considering careers where only a few students are selected each year.

With this workbook we do our best to give you a lot of the information you need to make a good choice.

Welcome to this exciting adventure - this is where your career journey starts!

The Subject Choice Team

HOW TO USE THIS WORKBOOK

The purpose of the workbook is to help you to collect as much information as possible to make the best possible subject choices.

To do this the workbook will guide you through the following steps:

You are going to be asked to do a lot of writing and thinking in this workbook. The more you know about yourself, your interests, your abilities and the subjects you can choose from, the better your subject choice decisions will be.

UNDERSTANDING WHO I AM

We are all a little bit like hippos. When the hippo is in the water we only see the ears and a bit of its head. Most of the body of the hippo is under the water.

In the same way, we don't always show others what we think, feel and dream about. Understanding who you really are will require you to look at the 'whole' you, that which is 'under the water' too.

Let's start with what you know about yourself!
After all - nobody knows more about yourself than you do!

FINALLY

Deciding on the subjects you need to take for the next few years at school is very important. If necessary, go through the workbook a few times to make sure of the choices you have made.

If you are still unsure please speak to your teachers or the person who facilitated this career choice process with you.

ACKNOWLEDGEMENTS

This workbook would not have been possible without the exceptional work done by experts such as Professor Kobus Maree and Dr Elizabeth Murphy (and her colleagues at CAPT). As educational experts they have spent their professional lives creating opportunities and methods for developing vibrant young minds.

We thank them for their scientific rigour and tireless work.
