Information about this report

This report describes how **Ann Example** performed in completing the Administrative Dilemmas test. The Administrative Dilemmas test measures an individual's judgement and decision-making skills in relation to typical situations that Administrative Staff might face in a job. The situations presented in the Administrative Dilemmas test relate to five competencies

Achieving Results

Effective Communication

Planning & Organisation

Service Orientation

Teamwork

In the Administrative Dilemmas test, **Ann Example** was required to rate the effectiveness of different actions that could be taken in response to the situations presented. These ratings are then scored based on how similar they were to those provided by job experts.

The Administrative Dilemmas test measures whether an individual can recognise how effective different actions are likely to be in response to a situation. It does not assess whether an individual would actually demonstrate those effective behaviours in practice, so please take this into consideration when reading this report. However, research indicates that tests measuring situational judgement can be useful predictors of performance at work.

If the Administrative Dilemmas test is administered in unsupervised conditions, an individual's identity cannot be verified by an administrator when taking the test. To verify an individual's level of capability in relation to the competencies assessed by the Administrative Dilemmas test, supervised methods of competency assessment should be used, such as simulation exercises and/or a competency-based interview.

Please remember that performance on the Administrative Dilemmas test is not fixed, and an individual's scores may change over time with practice, experience and training. In practice, the results from this test are likely to be valid for up to 12 months.

Use of the Administrative Dilemmas test is restricted only to registered individuals who have demonstrated the required level of competence to apply the test and interpret the results from it.

Score Profile

These results for the Administrative Dilemmas test are presented as Percentile Scores. The Percentile Scores indicate the percentage of the comparison group that **Ann Example** scored higher than. For test users who wish to use a standard score scale to interpret results, the equivalent T scores and Sten scores obtained by **Ann Example** are provided as an Appendix to this report.

The Overall Judgement score indicates the overall level of performance achieved by **Ann Example** in responding to the situations in the test. Sub-scores on the competencies assessed in the Administrative Dilemmas test are also provided for additional interpretation about test performance. The competency sub-scores can indicate relative strengths or potential areas for development in terms of judgement and decision-making. The sub-scores should be used with caution and interpreted in the context of the Overall Judgement score.
